

## 6.0 REFERENCES

Where there are multiple references by an author in the same year, references were indicated sequentially with the year and a letter (e.g., 1996a, 1996b, 1996c, etc.). For consistency, when references were also used in the RI report, the same reference letter was used in this report. If there is a gap in the lettering sequence in this report, it is because a reference was used in the RI report and not in this report.
